

## Special Activity Group 9

# Revision of partial safety factors

Convener: **Menegotto** (Univ. La Sapienza, Roma, Italy)

Members : **Bouchon** (SETRA-DGO, France), **Caspeele** (Ghent Univ., Belgium), **Creton** (ATS/BN Acier, France), **de Chefdebien** (LB7, France), **Denton** (Parsons Brinckerhoff, United Kingdom), **Helland** (Skanska Norge, Norway), **Hietanen** (Confed. Finnish Construction Industries, Finland), **Muttoni** (EPFL, Switzerland), **Taerwe** (Ghent Univ., Belgium)

Recent meetings: Paris (Nov 10)

## Terms of reference

### Scope

Established by the Technical Council meeting in Oslo in November 2009, the group had the remit to propose an up-date of the values traditionally used for partial safety factors in design. The revision should take into account the interaction of reliability, economy, sustainability and quality control and should be suggested for implementation into the Model Code 2010 currently being finalized by SAG5. The group reported to SAG 5 in December 2010 and is likely to be disbanded in 2011.
