2. FRP jacketing

2.1 Foreword

2.2 Basics

2.2.1 When to use this method

2.2.2 Materials

2.2.3 FRP jacketing Systems

2.3 Techniques

2.3.1 Basic FRP technique

2.3.2 Automated wrapping

2.3.3 Textile-reinforced mortar techniques (TRM) and Fabric Reinforced Cementitious Mortar (FRCM)

2.3.4 Prestressed jacketing

2.4 Personnel and equipment

2.4.1 Personnel

2.4.2 Equipment

2.5 Stakeholders’ roles and qualifications

2.5.1 Owner

2.5.2 Designer

2.5.3 Contractor

2.6 Design

2.6.1 Assessment of existing conditions

2.6.2 Codes and standards and other relevant references

2.6.3 Design procedure

2.7 Quality control

2.7.1 Quality control of materials

2.7.2 Quality control before intervention

2.7.3 Quality control of FRP Durability

2.7.4 Quality control during intervention

2.7.5 Quality control after intervention

2.8 Monitoring and maintenance

2.8.1 Monitoring

2.8.2 Maintenance

2.9 References
2.10 Case study 1
  2.10.1 Description of the structure 40
  2.10.2 Description of the intervention project 40
  2.10.3 Description of the strengthening procedure 40

2.11 Case study 2
  2.11.1 Description of the structure 43
  2.11.2 Bridge Capacity assessment 45
  2.11.3 Rehabilitation Intervention by using innovative materials 45

3. Steel jacketing 49
  3.1 Foreword 49
  3.2 Basics – Technique description 50
    3.2.1 When to adopt this method 50
    3.2.2 Techniques and materials 51
    3.2.3 Equipment 54
  3.3 Stakeholders’ roles and qualifications 54
    3.3.1 Owner 54
    3.3.2 Designer 55
    3.3.3 Contractor 55
    3.3.4 User 55
  3.4 Design 56
    3.4.1 Assessment of existing conditions 56
    3.4.2 Service life and reliability requirements 56
    3.4.3 Codes and standards and other relevant references 56
    3.4.4 Design assumptions 58
    3.4.5 Design procedure 58
    3.4.6 Supporting documents 65
  3.5 Execution 66
    3.5.1 Preparatory works 66
    3.5.2 Execution procedure 66
    3.5.3 Finishing 68
  3.6 Quality control 68
    3.6.1 Quality control of materials before intervention 68
    3.6.2 Quality control during intervention 68
    3.6.3 Quality control after intervention 69
  3.7 Monitoring and maintenance 69
    3.7.1 Monitoring 69
    3.7.2 Maintenance 69
    3.7.3 Post-intervention documentation 69
4.5 Execution
   4.5.1 Preparatory works
   4.5.2 System trials
   4.5.3 Execution procedure
4.6 Quality control
   4.6.1 Quality control of materials
   4.6.2 Quality control before intervention
   4.6.3 Quality control during intervention
   4.6.4 Quality control after intervention
4.7 Monitoring and maintenance
4.8 Case study
   4.8.1 Description of the structure
   4.8.2 Inspection highlights
   4.8.3 Description of the intervention project
   4.8.4 Description of the intervention works
   4.8.5 Description of maintenance operations
5. Concrete overlays
   5.1 Foreword
   5.2 Basics
      5.2.1 When to adopt this method
      5.2.2 Materials and systems
      5.2.3 Techniques
      5.2.4 Equipment
   5.3 Stakeholders’ roles and qualifications
      5.3.1 Owner
      5.3.2 Designer
      5.3.3 Contractor
   5.4 Design
      5.4.1 Assessment of existing conditions
      5.4.2 Service life
      5.4.3 Reliability requirements
      5.4.4 Codes and standards and other relevant references
      5.4.5 Design assumptions
      5.4.6 Design procedure
   5.5 Execution
      5.5.1 Preparatory works
      5.5.2 Execution procedure
   5.6 Quality control
      5.6.1 Quality control during intervention
6.7 Monitoring and maintenance
   6.7.1 Monitoring
   6.7.2 Maintenance
   6.7.3 Post-intervention documentation

6.8 Case study 1
   6.8.1 Description of the structure
   6.8.2 Inspection highlights
   6.8.3 Description of the intervention project
   6.8.4 Description of the intervention works
   6.8.5 Description of maintenance operations

6.9 Case study 2
   6.9.1 Description of the structure
   6.9.2 Inspection highlights
   6.9.3 Description of the intervention project
   6.9.4 Description of the intervention works
   6.9.5 Description of maintenance operations

6.10 Case study 3
    6.10.1 Description of the structure
    6.10.2 Inspection highlights
    6.10.3 Description of the intervention project
    6.10.4 Description of the intervention works

6.11 Case study 4
   6.11.1 Description of the structure
   6.11.2 Inspection highlights
   6.11.3 Description of the intervention project
   6.11.4 Description of the intervention works
   6.11.5 Description of maintenance operations

7. Externally applied or near surface mounted FRP
   7.1 Foreword
   7.2 Basics
      7.2.1 Applicability of these methods
      7.2.2 Materials and systems
      7.2.3 Techniques and strategies
   7.3 Design
      7.3.1 Assessment of existing conditions
      7.3.2 Codes and standards and other relevant references
      7.3.3 Design assumptions
      7.3.4 Design procedure
      7.3.5 Supporting documents
