

Contents

General concepts and design aspects – Materials and techniques T.C. Triantafillou, University of Patras, Greece	1
Detailing, technological aspects and durability G. L. Balázs, Budapest University of Technology and Economics, Hungary	29
Strengthening of RC beams with FRPs and FRP anchorages U. Akyuz, Middle East Technical University, Ankara, Turkey	41
Modelling aspects and design issues for anchorages, shear strengthening and confinement G. Monti, Università di Roma “La Sapienza”, Italy	53
FRP retrofitting of reinforced concrete two-way slabs B. Binici, O. Bayrak, Middle East Technical University, Ankara, Turkey	89
Overview of seismic strengthening strategies for concrete structures Z. Celep, Istanbul Technical University, Turkey	109
FRP strengthening of RC columns (shear, confinement and lap splices) Alper Ilki, Istanbul Technical University, Turkey	123
Seismic retrofitting of RC beam-column joints using FRP K.M. Mosalam, University of California, Berkeley, USA	143
Analysis of infilled reinforced concrete frames strengthened with FRPs G. Özcebe (lead author), B. Binici, U. Ersoy, T. Tankut, Middle East Technical University, Ankara, Turkey; S. Özden, Kocaeli University, Turkey; F. Karadogan, E. Yüksel, A. Ilki, Istanbul Technical University, Turkey	167
Design rules for seismic retrofitting with FRPs according to Eurocode 8 and their background. M.N. Fardis, University of Patras, Greece	199
