## Contents

1  **Summary**  
2  **The history and performance of offshore concrete structures**  
3  **Project planning and execution**  
4  **Design**  
   4.1  General  
   4.2  Loads  
   4.3  Design procedures  
5  **Construction**  
   5.1  Construction phases  
   5.2  Yard/dock specifics  
   5.3  Construction methods  
   5.4  Marine operations  
6  **Materials**  
   6.1  Concrete  
   6.2  Reinforcement and prestressing  
   6.3  Outfitting  
7  **Durability**  
   7.1  Corrosion of reinforcement  
   7.2  Freeze-thaw resistance of concrete  
8  **Environmental issues**  
   8.1  Environmental impact  
   8.2  Decommissioning/recycling  
9  **Concrete in the Arctic**  
   9.1  Oil and gas reserves  
   9.2  The Arctic  
   9.3  Interaction with ice  
   9.4  Interaction with icebergs  
   9.5  Client perceptions  
10  **Other applications**  
11  **Codes and standards**  
12  **Bibliography**
