Contents

Preface
Stephen Foster, Fausto Minelli, Giovanni Plizzari and Viktor Sigrist iii

1 A historical review of shear
György L. Balázs 1

PART I: Background to draft Model Code 2010

2 MC2010: Shear strength of beams and implications of the new approaches
Evan C. Bentz 15

3 MC2010: The Critical Shear Crack Theory as a mechanical model for punching shear design and its application to code provisions
Aurelio Muttoni and Miguel Fernández Ruiz 31

4 MC2010: overview on the shear provisions for FRC
Marco di Prisco, Giovanni Plizzari and Lucie Vandewalle 61

PART II: Recent advancements in shear and punching shear of R/C structures

5 Improving analytical models for shear design and evaluation of reinforced concrete structures
Michael P. Collins 77

6 A structured approach to the design and analysis of beams in shear
Viktor Sigrist and Britta Hackbarth 93

7 Shear in slabs and beams: should they be treated in the same way?
Aurelio Muttoni and Miguel Fernández Ruiz 105

8 Residual shear bearing capacity of existing bridges
Joost Walraven 129

9 Development of Dutch guidelines for nonlinear finite element analyses of shear critical bridge and viaduct beams
Jan Rots, Beatrice Belletti, Cecilia Damoni and Max Hendriks 139

10 Components of shear resistance in prestressed bulb-tee girders
Daniel Kuchma, Shaoyun Sun, Tom Nagle and Kang Su Kim 155

11 Thin-walled open-section P/C beams in fire: a case study
Patrick Bamonte, Roberto Felicetti, Pietro G. Gambarova and Ezio Giuriani 173
PART III: Recent advancements in shear and punching shear of FRC structures

12 Design of FRC beams for shear using the VEM and the draft Model Code approach 195
   Stephen Foster

13 Shear strength of FRC members with little or no shear reinforcement: a new analytical model 211
   Fausto Minelli and Giovanni A. Plizzari

14 Effectiveness of steel fiber as minimum shear reinforcement: panel tests 227
   Jimmy Susetyo and Frank J. Vecchio

15 Use of steel fibre reinforcement for shear resistance in beams and slab-column connections 243
   Gustavo J. Parra-Montesinos, James K. Wight, Hai H. Dinh and Min-Yuan Cheng
