5.3 Preparation of production and erection drawings 58
5.4 Manufacturing facilities 59
  5.4.1 Formwork / Moulds 60
5.5 Reinforcement 61
  5.5.1 Reinforcement cage assemblies 61
  5.5.2 Prestressing 62
5.6 Concrete Placement 62
  5.6.1 Transportation 62
  5.6.2 Segregation 63
  5.6.3 Consolidation 63
  5.6.4 Facing Concrete 64
5.7 Surface Finishes 64
  5.7.1 General Methods 66
  5.7.2 Chemical surface retarders 66
  5.7.3 Abrasive blasting to expose aggregate 68
  5.7.4 Honing and polishing 69
  5.7.5 Acid etching 70
5.8 Concrete Curing 71
  5.8.1 Curing recommendations 71
  5.8.2 Curing techniques 72
5.9 Storage 72

6 Transport and Installation 74
  6.1 General 74
  6.2 Transport and Delivery 75
  6.3 Planning and Preparation 77
  6.4 Panel Handling and Site Storage 78
    6.4.1 General 78
    6.4.2 Delivery sequence 79
    6.4.3 Lifting devices 80
  6.5 Jobsite Storage 80
    6.5.1 General 80
    6.5.2 Panel support 81
    6.5.3 Storage on delivery vehicle 81
  6.6 Panel Erection 82
    6.6.1 Workmanship 83
    6.6.2 Equipment 84
    6.6.3 Bracing and guying 84
    6.6.4 Alignment 87
    6.6.5 Bolted connections 87
    6.6.6 Welded connections 88
    6.6.7 Post-tensioned connections 88
    6.6.8 Dowels and grouting 88
7  Inspection and Repair  

7.1  General  

7.2  Inspection at Manufacturing Plant  

7.3  Dimensional Tolerances  

7.4  Jobsite inspection of damage  

7.5  Cleaning  

7.5.1  Protection  

7.5.2  Stubborn stains  

7.5.3  Sandblasting and steam cleaning  

7.5.4  Sealers  

7.6  Patching and Repair  

7.6.1  General  

7.6.2  Repair considerations  

7.6.3  Chips and spalls  

7.6.4  Crack repair  

7.7  Joint Sealing (Caulking)  

7.7.1  Joint preparation  

7.7.2  Sealant installation  

7.7.3  Two-stage joints  

7.8  Repair during Life-Cycle
